Introduction

WHAT *STAR* ANNUAL INDEXES ARE

These Annual Indexes are edited consolidations of the indexes to the individual issues of *Scientific and Technical Aerospace Reports (STAR)* for the calendar year 1969 (Volume 7, Numbers 1 through 24). For the convenience of the user, they are divided into four sections, each bound separately. Sections I and II contain the Subject Index. Section III contains the Personal Author Index. Section IV contains a Corporate Source Index, a Contract Number Index, a Report/Accession Number Index, and an Accession Number/Report Index. The Annual Indexes supersede the semimonthly and quarterly indexes previously issued during 1968.

Each entry in these indexes includes a group of identifying numbers in the following form: 06 p 0950 N69-16996. The first two digits (06) identify the issue in which the document was announced. The "p" stands for page number, and the four digits that follow (0950) refer to the page number, in the designated issue, on which the abstract of the document appears. The next group of numbers (N69-16996) is the NASA Accession Number, a unique identification number assigned by NASA to each document that was acquired, indexed, and announced in *STAR* during the year.

In addition to these identifying numbers, each entry in the Subject Index contains a Notation of Content, a brief description of the contents of the document; each entry in the Personal Author and Corporate Source Indexes contains the exact title of the document.

At the beginning of each index in this cumulation, a typical listing is illustrated with each of its elements identified to assist the reader in using the different types of index entries.

HOW TO USE THE SUBJECT INDEX

Subject terms in this cumulative index are arranged alphabetically, and are supplemented with cross-references which are intended to serve as directions that will enable the user to modify, enlarge, or narrow his search in accordance with his specific interests. Two types of cross-references are used:

1. Use (U) references indicate that the subject term is not "postable", i.e., not a valid term, and that the following term or terms are used instead. For example,

   COLUMBIUM
   U NIOBIUM
   ANNULAR JETS
   U ANNULAR FLOW
   U JET FLOW

2. Narrower Term (NT) references indicate that the subject terms following the NT notation represent more specific concepts than the terms used. For example,

   EMISSION
   NT ELECTRON EMISSION
   NT NEUTRON EMISSION
   NT THERMAL EMISSION

Finally, a searcher should use the notations of content in the Index to narrow further his quest for particular items. This is because subject terms can readily include more than one class of document. For example:

CATHODES

Cesium plasma cathodes as sources of high intensity electron beams.

Cathode material testing in electrochemical half cells.

illustrates a case where two references on different topics are listed under the same subject term.

AVAILABILITY OF *STAR*

STAR is available to the public on subscription from the Superintendent of Documents, U. S. Government Printing Office as noted on the inside cover. *STAR* is also available without charge to the following:

1. NASA Offices, Centers, contractors, subcontractors, grantees, and consultants;
2. Other U.S. Government agencies and their contractors;
3. Libraries in the United States that have arrangements with NASA to maintain collections of NASA documents for public use;
4. Other organizations in the United States having a need for NASA documents in work related to the aerospace program; and
5. Foreign government or academic organizations that have established appropriate reciprocal arrangements with NASA.

AVAILABILITY OF DOCUMENTS

All documents announced in *STAR* are available to the public as indicated in the citation.

AVAILABILITY OF NASA DOCUMENTS

NASA documents are identified by an asterisk in the abstracts section and in the report/accession number and accession/report number indexes. NASA documents that have been microfiched[1] (identified by the # sign in citation) are available on microfiche without charged to an organization eligible to receive *STAR*. Selected NASA documents are formally printed and are available without charge in printed form on initial distribution to the organization eligible to receive *STAR*.

AVAILABILITY OF NON-NASA DOCUMENTS

Non-NASA documents are those documents that do not carry an asterisk in the citation.

Department of Defense documents (identified by the "AD" number in the citation and indexes) are available subject to a service charge in hard copy or microfiche from the Clearinghouse for Federal Scientific and Technical Information, Springfield, Virginia 22151. Microfiche copy of DOD reports will continue to be available to Defense Documentation Center users at no cost from the Defense Documentation Center, Cameron Station, Alexandria, Virginia 22314.

National Lending Library (NLL) for Science and Technology translations are available from NLL at the price stipulated in the citation. Requests for purchase should be addressed to:

National Lending Library for Science and Technology
Boston Spa, Yorkshire, England.

Dissertations selected from *Dissertation Abstracts* are available in xerographic copy and on microfilm for sale from University Microfilms, Inc., Ann Arbor, Michigan, 48106. All requests should cite the author and order Number as they appear in the citation. Note that the dissertations are provided on microfilm and not microfiche.

(1) A microfiche is a transparent sheet of film, 105 × 148mm in size, capable of containing up to 72 pages of information reduced to micro images (not to exceed 20:1 reduction).

Other non-NASA documents are publicly available as indicated in the citation. Those documents which have been microfiched are available on microfiche without charge only to NASA Offices, Centers, contractors, subcontractors, and consultants.

If you are registered with NASA and eligible to receive reports as described above, send the completed *Document Request* (Facility Form 492) to:

NASA Scientific and Technical Information Facility
P. O. Box 33
College Park, Maryland 20740

If your are not registered with NASA and wish to receive information concerning registration, request *Registration Form–Technical Publications* (Facility Form 713) from the NASA Scientific and Technical Information Facility at the address given above. Others may obtain microfiche copies by purchase from:

Clearinghouse for Federal Scientific and Technical Information
(CFSTI)
Springfield, Virginia 22151

U. S. GOVERNMENT SALES AGENCIES

Publications with a CFSTI availability statement in the citation are sold in hard copy and microfiche copy by:

Clearinghouse for Federal Scientific and Technical Information
(CFSTI)
Springfield, Virginia 22151

The following unit price has been established by CFSTI: $3.00 for hard copy, $0.65 for microfiche.

Superintendent of Documents, U. S. Government Printing Office (SOD)
Washington, D. C. 20402

NASA documents available from the SOD are also available from CFSTI at the SOD price given in the citation.

NOTE: Documents announced without a specific availability statement may be requested from the issuing activity.

Bibliographic information, e.g., report number, etc., rather than the NASA accession number (i.e., N69-12345), should be provided when requesting a document from other than NASA.

COSATI SUBJECT CATEGORY CODE

In the citation of each NASA-supported document and of some non-NASA documents is a code, e.g., CSCL 25A that indicates the subject category assigned to it from the COSATI Subject Category List (first ed. December, 1964) published by the Committee on Scientific and Technical Information of the Federal Council for Science and Technology.

ABSTRACTS OF JOURNAL ARTICLES

By arrangement between NASA and the American Institute of Aeronautics and Astronautics, the AIAA publication *International Aerospace Abstracts* is issued in coordination with *STAR*. Each journal appears on alternate weeks. *IAA* uses subject categories identical with those in *STAR*, and publishes similar indexes. *IAA*'s worldwide coverage of books and journals complements *STAR*'s worldwide report coverage. The two publications thus provide comprehensive access to current literature on aerospace science and technology.

Organizations having a NASA contract may obtain *IAA* by writing NASA, Code USI, Washington, D. C. 20546. Others should direct inquiries to the American Institute of Aeronautics and Astronautics, 750 Third Avenue, New York, New York 10017.

Annual subscription rates for *IAA*:

Semimonthly issues: United States and possessions, $54.00 postpaid; foreign countries, $68.25 postpaid.

Cumulated Index Volumes: United States and possessions, $30.00 postpaid; foreign countries, $35.00 postpaid.

INDEXING VOCABULARY

The Preliminary Edition of the *NASA Thesaurus* (December 1967) (NASA SP-7030) is used as the authority for the indexing vocabulary that appears in the subject index. The *NASA Thesaurus* should be consulted in examining the current indexing vocabulary including associated cross reference structure. Only the subject terms that have been selected to describe the documents abstracted in this issue appear in the subject index. Copies of the *NASA Thesaurus* may be obtained from the Clearinghouse for Federal Scientific and Technical Information or the U. S. Government Printing Office at $8.50 for the three-volume set.

EUROPEAN AVAILABILITY OF NASA DOCUMENTS

European requesters may purchase facsimile copy or microfiche of NASA and NASA-sponsored documents, those identified by both the symbols "#" and "*", from:

NASA PATENTS AND PATENT APPLICATIONS

Patents and patent applications owned by NASA are announced in *STAR* under appropriate subject categories and are referenced in the *STAR* indexes. They are identified by U.S. Patent No. and U.S. Patent Appl. Serial No. (SN) in the report/accession number index. The NASA Case number appears in lieu of the report number in the other indexes.

Copies of NASA patent application specifications are sold by the Clearinghouse for Federal Scientific and Technical Information at the established unit price of $3.00 for hard copy and $0.65 for microfiche. The NASA accession number should be used for ordering from CFSTI.
